

## 2x3 lens T3M designed by 5050 LED for street lighting

Model:	AJST50D6LEDT3-3S
Size:	50x50(mm)
Height:	7.25mm
Beam Angle:	Type III
Material:	PC
Transmittance:	>88%
LED Type:	5050LED

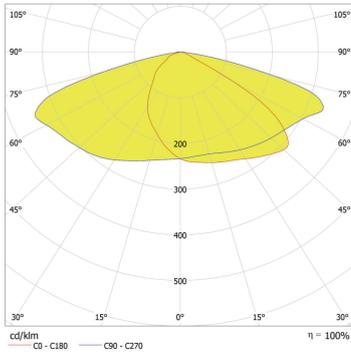

### FEATURES

1. The 2x3 lens T3M is specifically designed for 5050 LEDs, providing precise and uniform light distribution for road lighting applications.
2. This 2x3 lens maximizes the light output of 5050 LEDs, delivering high brightness and energy efficiency. Its design minimizes light loss and enhances the performance of LED systems, offering a cost-effective and eco-friendly solution for road lighting.
