

## 43mm Diameter COB Led Down Light Lens 22mm Height

Model:	ADCOB4322D
Size:	Ø43mm
Height:	22.5mm
Beam Angle:	24°, 38°, 60°
Material:	PMMA
Transmittance:	90%
LED Type:	COB LED

## FEATURES

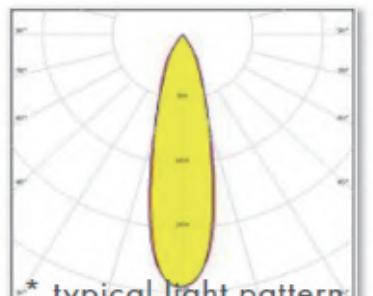

1, 43mm Diameter Cob Led Down Light Lens 22mm Height

2, COB lenses are used to precisely control the light emitted by the COB LED. They help to focus and direct light in a specific direction, allowing for efficient light distribution and minimizing light loss.

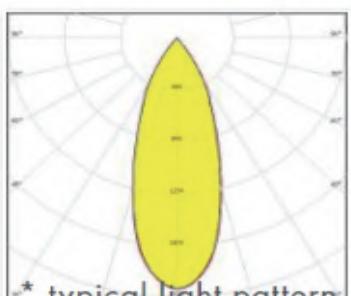

3, COB lenses are designed with specific shapes that determine the direction of light. The curvature and contours of the lens surface can be optimized to control the outgoing light beam. For example, a narrower profile concentrates the light into a more focused beam, while a lens with a wider profile disperses the light over a broader area.
