

58mm COB Chip Lens With Buckle For Easy Assemble

Model	AHCOB5831D
Size:	Ø58mm
Height:	31.6mm
Beam Angle:	13°,24°,38°,60°
Material:	PMMA
Transmittance:	90%
LED Type:	COB LED

FEATURES

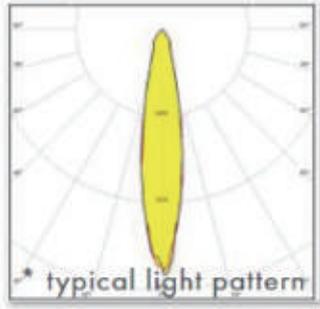

1, 58mm Cob Chip Lens With Buckle For Easy Assemble

2, COB lenses are engineered to maximize the optics efficiency of COB LEDs. They are designed to minimize light loss and ensure a high percentage of the emitted light is effectively directed toward the target area. This results in improved energy efficiency and reduced wasted light.

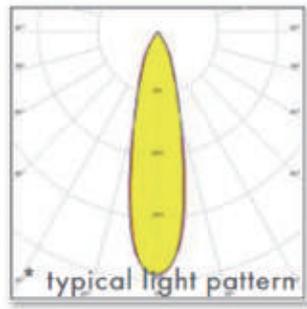

3, COB lenses help create a uniform light distribution, minimizing hotspots and ensuring even illumination across the target area. This is particularly important in applications such as retail lighting and display lighting where consistent and uniform lighting is required to highlight products or create visually appealing lighting effects.
