FEATURES

1, RGBW is a common color mixing system used in stage lighting fixtures such as LED wash lights or moving heads.

2, RGBW stands for Red, Green, Blue, and White, and it refers to the combination of these four colors to create a wide range of colors and shades.

3, RGBW lenses are employed in hotels, restaurants, and bars to create a welcoming and immersive atmosphere. These lenses enable the creation of lighting scenes that complement the overall ambiance, enhance the dining experience, and set the desired mood. and focused light.

2. LED lenses with a narrow 5° beam angle, allows for more control over the direction of the light and can help to create a more dynamic and visually interesting lighting design.

3. Ideal for stage lighting, architectural lighting, and decorative lighting applications
