

## Linear Lens For Retail Lighting

Model:	ASL280D40H56LED90G
Size:	280x40(mm)
Height:	7.1mm
Beam Angle:	90°
Material:	PMMA
Transmittance:	>93%
LED Type:	2835/3030/3016LED

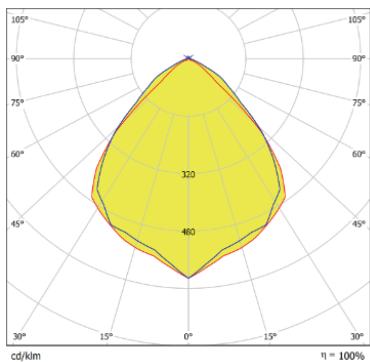

## FEATURES

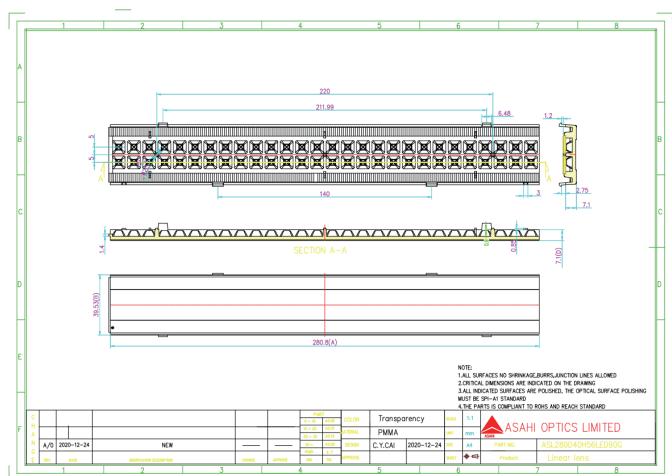

1. The lens is specifically designed to be compatible with a linear array or strip of 56 LEDs. It is engineered to match the spacing and arrangement of the LEDs to ensure optimal light distribution and performance.
2. The lens provides a fixed beam angle of 90 degrees. This means that the light emitted from the LEDs is spread out in a wide-angle pattern, covering a larger area compared to narrower beam angles.
3. The lens helps control the direction and spread of light emitted by the 56 LEDs, ensuring that the light is efficiently distributed in the desired area or surface within the 90-degree beam angle. It provides a wide and even.
4. The lens aids in distributing the light evenly across a specific area or surface within the 90-degree beam angle. It helps minimize hotspots or dark spots, providing a uniform and consistent illumination from the linear LED array.
